MINNESOTA BICYCLE MAP

2019

DEPARTMENT OF TRANSPORTATION

Minnesota developed its U.S. Bicycle Routes by joining existing roads and trails to create continuous bicycle routes. Minnesota's routes offer segments suitable for all types of bicyclists, yet those riding an entire route must be capable of sharing the road with cars and trucks.

U.S. Bicycle Route 41, also known as the North Star Bicycle Route, connects St. Paul, Minnesota's Capital City, to Canada. Nearly half the route is on state or regional trails that link and wind through some of Minnesota's most beloved and popular locations, such as the Mississippi National River and Recreation Area, Grand Portage National Monument, Superior National Forest and nine state parks.

U.S. Bicycle Route 45, also known as the Mississippi River Trail (MRT), begins at the Mississippi Headwaters in Itasca State Park. The route closely follows the Mississippi River, which widens and passes through a changing landscape from pine forests to limestone bluffs, continuing to the Gulf of Mexico. Just over one quarter of the route is on state or regional trails.

Combined, U.S. Bicycle Routes 41 and 45 continuously connect two of the world's great water bodies, Lake Superior, the world's largest freshwater lake (by area) and the Mississippi River, the world's fourth longest river - all by bicycle.
