

Red Wing Bridge Project

Hwy 63 Bridges and Approach Roadways Project

NEWSLETTER 2 • OCTOBER 2016

Red Wing Bridge Project

Final Design Public Open House #2

Thursday, Nov. 3, 2016
5:00 p.m. - 7:00 p.m.*

**Presentation begins at 5:30 p.m.*

The Minnesota and Wisconsin Departments of Transportation are hosting an open house for the Red Wing Bridge Project on November 3 from 5-7 p.m. in the Foot Room of the Red Wing Public Library (225 East Avenue, Red Wing, MN). An informational presentation will begin at 5:30 p.m., but the public is encouraged to arrive at any time. Information presented will include construction schedule and details, project aesthetics, right-of-way status, and utility updates. Project staff will be available to discuss recent project developments and answer questions. Your feedback is valuable to the team in helping make this a successful project.

Project Update

This is an exciting time for the project as final design is wrapping up and we look forward to beginning construction in a few months!

In August, local representatives from the Visual Quality committee met with the project team to provide additional guidance on aesthetic features as part of the final design phase of the project. The committee reviewed landscaping, roadway lighting, and other streetscape amenities, which have been incorporated into the engineering plans.

Engineering plans also include construction staging and detours which are being finalized to minimize impacts to the community and traveling public. The plans will include construction timelines, traffic configurations, and other details to be used during the different construction phases. Visuals will be provided at the meeting.

Right-of-way acquisitions and relocations are in progress. All right-of-way properties impacted by the project will be acquired by early 2017.

We look forward to seeing you at the open house and your continued support for this important river crossing project.

Schedule

Final design is scheduled to be complete by the end of 2016. Engineering plans will be advertised and a Contractor will be selected in March 2017. Construction is anticipated to begin in the spring of 2017 and continue into 2020.
