Hazardous Waste Contractor

Hazardous waste is regulated under Minnesota Rules Chapter 7045. Generally speaking, hazardous wastes can include but are not limited to the following general types of wastes: liquids with flash points less than 140º F, acids or bases with a pH less than 2 or greater than 12.5 respectively, pesticides, heavy metals (arsenic, barium, chromium, cadmium, lead, mercury, selenium, silver), specifically listed chemicals (examples include but are not limited to trichloroethylene, carbon tetrachloride and vinyl chloride), pesticides/herbicides (examples include but are not limited to 2-4D, 2-4-5-T, lead arsenate), poisons (examples include but are not limited to mouse and rat poison). For further detail, see section on Evaluating Waste.

Procedure for arranging disposal or recycling through the hazardous waste contractor

1. Determine the exact description of the materials to be disposed of or recycled.
2. A work order must be completed before the MnDOT hazardous waste contractor can transport waste. Use the drop-down menu on the work order form to select the appropriate waste. The corresponding Hazardous Waste Commodity Identifier Number will automatically be provided when selecting the waste type. Note that “abandoned containers” is included in the drop-down menu. Contact the Office of Environmental Stewardship if the waste type you need is not included in the drop-down menu.
3. Save documentation in accordance with the MnDOT recordkeeping procedure.

The following Contractor is approved to collect MnDOT hazardous waste for disposal or recycling:

Veolia ES Technical Solutions, LLC
3220 101st Avenue
Blaine, MN 55449
Contact: Duane Aldridge
Office: 763.786.3660
Cell: 612.328.0930
Duane.aldridge@veoliaes.com

Regulated Waste Contractors

Typically, recycling regulated waste reduces documentation requirements, is less costly and more beneficial for the environment than disposal alternatives. Even specific types of hazardous wastes can be recycled. Recycling has the added benefit of exempting the wastes from being included against MnDOT’s hazardous waste generating status.

Procedure for arranging disposal, recycling or reuse through the regulated waste contractors

1. Option 1: Use MnDOT approved vendors to transport and accept waste for disposal or recycling. Contact information on current MnDOT approved vendors is provided below. Option 2: Check available Transfer of Ownership forms to arrange for reuse of some types of waste materials. Contact the Office of Environmental Stewardship if a Transfer of Ownership form is not available for the waste type being offered for reuse.
2. Determine the exact description of the materials to be disposed of, recycled or reused.
3. Contact the appropriate approved vendor to arrange for waste pickup.
4. Save documentation in accordance with the MnDOT recordkeeping procedure.
The following contractors are approved by MnDOT to recycle specific types of wastes:

**Computer/Electronics**
Electronic equipment including televisions, computers, monitors (including cathode ray tubes made of leaded glass) and radios can contain significant amounts of heavy metals, such as lead and silver. Computers must either be reused or recycled. Contact Fleet and Surplus Service to make arrangements for reuse of functional computers. Contact Asset Recovery Corporation or Green Lights Recycling, Inc for recycling non-functional computers or for any computers that Fleet and Surplus Service will not accept.

The following contractors are approved to collect computer and other electronic equipment:

<table>
<thead>
<tr>
<th>Company</th>
<th>Address</th>
<th>Phone Numbers</th>

<td>2299 Territorial Rd, St. Paul, Mn 55114</td>
<td>651-602-0789</td>
</tr>
</tbody>
</table>

**Fluorescent Lamps/ HID/ Ballasts**
Mercury is found in fluorescent lamps, high intensity discharge lighting and mercury lighting. Light ballasts and capacitors can contain PCB oils. The following contractors are approved to collect fluorescent lamps and HID:

<table>
<thead>
<tr>
<th>Company</th>

</tr>
</tbody>
</table>

**Storage Tanks- Removal, Recycle or Disposal, Bottoms (sludge), Oil Contaminated Dirt, and Cleaning**
The Minnesota Pollution Control Agency regulates disposal/recycling of storage tanks and tank bottoms. Fuel storage tanks often contain tank bottoms or sludge. The tank bottoms are considered hazardous because it normally contains heavy metals such as lead or chromium and has a flash point below 140º F. The following contractors are approved to recycle storage tanks and tank bottoms:

<table>
<thead>
<tr>
<th>Company</th>

<td>218-722-2920</td>
</tr>
</tbody>
</table>

**Antifreeze**

The following options exist for recycling antifreeze:

1. Dispose as hazardous waste through the following contractor:
   Veolia ES Technical Solutions, LLC
   3220 101st Avenue
   Blaine, MN 55449
   Contact: Duane Aldridge
   Office: 763.786.3660
   Cell: 612.328.0930
   Duane.aldridge@veoliaes.com

2. Dispose of antifreeze in the municipal sanitary sewer system ONLY if the municipality grants MnDOT written permission to do so.

3. Recycle with one of the following contractors:

<table>
<thead>
<tr>
<th>Contractor</th>
<th>Address</th>
<th>Phone</th>
</tr>
</thead>
<tbody>
<tr>
<td>Como Lube</td>
<td>1108 Port Terminal Dr., Duluth, MN 55816-0987</td>

JIngalls@stericycle.com
Problem Wastes
These are wastes that are generally not considered hazardous but are troublesome to dispose of due to landfill restrictions associated with free liquid content or the bulky nature of the waste or concern over future environmental liabilities.

The following contractors are approved to recycle or dispose of problem wastes:

**Latex Paints**
Liquid waste latex paint, although non-hazardous, cannot be landfilled. The following contractor is approved to arrange recycling or disposal of liquid latex paint:

Amazon Environmental, Inc.
7180 West Commerce Circle
Fridley, MN 55432
Contact: John Segala
Ph: 763-572-0800

Totally dry latex paint can be land filled in any MPCA permitted mixed municipal solid waste landfill. Dry latex paint can also be recycled through the above listed contractor.

**CFC Refrigerants**
CFC refrigerants are contained in air conditioning, heat pumps, refrigerators, and freezers. A licensed refrigerant contractor must remove all CFC’s before the equipment can be land filled. Two options exist to perform this work:

1. For equipment that is attached to a building such as central air conditioning and heat pumps, a licensed refrigeration contractor can be retained to remove the CFC’s.

2. Freestanding equipment such as refrigerators, freezers, and window air conditioners may be taken to any MPCA Permitted Mixed Municipal Landfill. The landfill will have an extra charge for acceptance if these wastes. The landfill will insure the CFC’s are properly removed.

3. Freestanding equipment such as refrigerators, freezers, and window air conditioners may also be taken to:
   Green Lights Recycling, Inc.
   10040 Davenport St NE
   Blaine, Mn  55449-4327
   Ph: 800-208-8340

**White Goods**
White goods include home appliances such as stoves, dishwashers, microwaves, hot water heaters, furnaces and tires. White goods cannot be disposed of in landfills along with typical solid waste materials (trash). However, most MPCA Permitted Mixed Municipal Landfills will accept white goods at an extra charge if the white goods are separated from the solid waste materials. The landfill will have any CFC refrigerants removed before disposal.

Better Futures Enterprises
6100 Olson Memorial Highway
Minneapolis, MN 55405
612-718-6089
Tim Hanson
Tires

Tires can be recycled through the following contractor:

First State Tire
22921 Johnson Street
East Bethel, MN 55005
(612) 434-0578

Tires can be re-tread through the following contractors:

Wingfoot Commercial Tire
3815 Nicols Road
Eagan, MN 61611
651-454-0540
Contact: Pat McGurran

Treated Wood

Treated wood is defined as a wood impregnated with pesticides to delay decay. Typical preservatives include but are not limited to, creosote, pentachlorophenol, CCA, AZCA, ACQ. Wood treated with these chemicals cannot be disposed of in a demolition debris landfill. Following are disposal/recycling options for treated wood:

1. Disposal
All treated woods may be disposed of in any MPCA Permitted Mixed Municipal Landfill that will accept these wastes. It is highly recommended to contact the landfill in advance to verify what types of treated wood they will accept, if any. See available landfills in next section below.

2. Recycling of creosote treated wood for energy recovery.
It is highly recommended to contact MnDOT Environmental Stewardship before using the energy recovery option. Volumes of creosote treated wood greater than 10,000 railroad ties can be ground and used for energy recovery.

Approved contractor for grinding creosote treated wood:
Dakota Wood – Grinding, Inc.
15325 Babcock Ave.
Rosemount, MN 55068-6126
John T. Guillemette
Office: 651-322-2622
Fax: 651-322-4270

3. Reusable wood is defined as wood that clearly can be reused for its intended purpose. This does not include scrap, broken, rotted, or otherwise waste wood. Reusable treated wood can be transferred to others using the appropriate transfer of ownership form. Contact MnDOT Environmental Stewardship for help in using transfer of ownership forms.

Landfills/Regulated Waste

Regulated waste is any waste that is not regulated as hazardous. In general, these wastes are comprised of treated wood, asbestos, petroleum contaminated soil, used paint abrasive media. This waste can be disposed of at any MPCA Permitted Mixed Municipal (Sanitary) Landfill or MPCA Permitted Industrial Landfill.

Other approved landfills include: The La Crosse County Landfill in Wisconsin, Dem Con Landfill in Shakopee, and SKB Rosemount.

Construction & Demolition Debris Recycling

See List on Page 10

Traffic Cones (PVC) can be recycled back through the manufacturer:

Lakeside Plastics
450 W. 33rd Avenue
Oshkosh, WI 54903-2384
Contact: Jeff 920-235-3620

No collection service.

Revised 1 April 2014
Traffic Barrels (not cones), HDPE/LDPE Plastic, Steel Drums can be recycled for profit through:
Consolidated Container Company
109 27th Avenue NE
Minneapolis, MN 55418
Contact: Carol Banks  612-706-2166
Tina French  612-706-2122

The Company will collect and recycle all MnDOT's (HDPE) barrels at a value estimated at $.05 - $.10 per lb., depending on the cleanliness of the containers (no reflectives, labels, dirt, etc.)
**For free collection:** Metro must have 100-200 barrels, Outstate Districts must have 400-500 barrels

Photographic Waste
Film, negatives and photographic paper can be disposed of as a hazardous waste through the hazardous waste contractor or recycled and the silver recovered through:
Enviro-Chem
21821 Industrial Boulevard
Rogers, MN 55374
800-999-1294
Contact: Tod Perron

Demolition Debris
Demolition debris is typically comprised of debris from building or road demolition projects including but not limited to: concrete, bituminous, glass, brick and untreated wood. Demolition debris does not include treated wood or asbestos containing materials.

Demolition debris can be taken to any MPCA permitted demolition debris landfill. **Demolition debris shall not be disposed of in a permit-by-rule landfill.**
