Basemaps Tool

A basemap is layer that provides a background in your map and is not editable. Streets, topography and aerial imagery are all examples of basemaps or layers.

With this tool the use will be able to choose which basemap that they want to use.

1.) Left click the Tools icon.
2.) A window will appear. Left click on the Basemaps icon
3.) You will have 5 options.
4.) To select the basemap you want drag your cursor over to the icon and left click
