

STATE OF MINNESOTA

2024-2027 STATE TRANSPORTATION IMPROVEMENT PROGRAM (STIP)

FALL OF 2023

395 John Ireland Blvd.
St. Paul, MN 55155

September 29, 2023

To the Reader:

The State Transportation Improvement Program (STIP) is a comprehensive four-year schedule of planned transportation projects to maintain and improve the transportation system in Minnesota for state fiscal years 2024, 2025, 2026, and 2027. These projects are for state trunk highways, local roads and bridges, rail crossings, port development, and transit capital and operating assistance. This document represents an investment of over \$15 billion in federal, state, and local funds over the four years.

The STIP is the statewide transportation program in which MnDOT, state and local governments, community and business interest groups worked together in eight District Area Transportation Partnerships (ATPs) to discuss regional priorities and reach an agreement on important transportation investment decisions. The process is refined through the coordinated efforts of MnDOT collecting inputs from the Legislators, state and federal agencies, metropolitan planning organizations, local and tribal governments, transportation providers, citizens, and other interested parties to encourage diverse viewpoints and promote equity into the decision making.

The Bipartisan Infrastructure Law (BIL), also known as The Infrastructure Investment and Jobs Act (IIJA), passed in November 2021, authorized federal funding for Minnesota's transportation system. This STIP ensures that maximum benefits are received from available funding sources and that MnDOT will continue to work hard to provide a high quality, safe transportation system for Minnesota and support our vision of maximizing the health of people, the environment, and our economy.

The STIP is a fiscally balanced set of transportation investments with projects that are scheduled to be delivered within the fiscal years shown. However, project schedules are projections and are subject to change based on unforeseen circumstances such as federal funding uncertainty, cost increases, delays in securing necessary agreements/certifications, complex design and environmental issues that need resolution. Unpredictable events can sometimes occur between the initial conception of a construction project that may impede or accelerate progress.

Any questions and comments on specific projects included in this program may be directed to the identified MnDOT District Transportation office listed in the Program Listing sections of the document. To further assist you in using this information, a searchable database will be available by October 2023 on the Internet at: <https://www.dot.state.mn.us/planning/program/stip.html>

To request the STIP document in an alternative format, go to: <https://www.dot.state.mn.us/ada/contacts.html>

Thank you for your interest and support in Minnesota's Transportation System.

PREFACE

State of Minnesota State Transportation Improvement Program (STIP) 2024-2027

This document is the State of Minnesota State Transportation Improvement Program (STIP) for state fiscal years 2024-2027. It includes an introduction, or overview, of the anticipated expenditures for the different modes of transportation. The document is organized into three chapters and four appendices.

Chapter I of this document is the introduction to MnDOT. It provides information on MnDOT's vision for its transportation system and the factors that help shape MnDOT's policies and programs.

Chapter II is the formal response to the federal requirements for the STIP developed under the Federal Transportation Acts. The programming process to develop this STIP began in the fall of 2022 and was developed under the requirements outlined in IJA with a conservative estimate of federal funds anticipated.

Chapter III includes the project listing, but not limited to, all projects using federal-aid highway or transit funding. These listings are organized by MnDOT District.

Appendix A includes a description, expenditure summary and project listing for several federal-aid highway and transit categories. A description of the MnDOT State Road Construction Program (SRC) is also included, but without a repeat of the project listing of state trunk highway projects. Appendix B includes, for information purposes only, the STIP

investment summary and system performance outcomes. Appendix C includes a detailed financial plan for the STIP. Appendix D provides a list of federal lands projects that were selected by the Eastern Federal Lands Highway Division.

Once approved by the US Department of Transportation (USDOT), the STIP is available on the Internet at the following address:

<http://www.dot.state.mn.us/planning/program/stip.html>

I. INTRODUCTION

The State of Minnesota operates a transportation system that includes aeronautics, highways, motor carriers, ports, public transit, and railroads. MnDOT is the principal agency in the state for development, implementation, administration, consolidation, and coordination of state transportation policies, plans, and programs. These policies, plans, and programs are developed in cooperation with the public and a variety of transportation partners, including the Twin Cities Metropolitan Council, seven greater Minnesota Metropolitan Planning Organizations (MPOs) established in areas with populations exceeding 50,000, nine Regional Development Commissions (RDCs), county, city, and Indian tribal governments throughout the state.

The MnDOT vision is that Minnesota's multimodal transportation system maximizes the health of people, the environment and our economy. The system:

- connects Minnesota's primary assets – the people, natural resources and businesses within the state – to each other and to markets and resources outside the state and county.
- provides safe, convenient, efficient and effective movement of people and goods; and
- is flexible and nimble enough to adapt to changes in society, technology, the environment and the economy.

A number of factors are shaping the development of MnDOT policies, plans, and programs. These include safety, the integration of transportation modes, service and investment preservation, customer focus, economic development, technology, environmental partnerships, and federal and state actions. This document addresses these factors and provides a multimodal focus. The investment in transportation infrastructure improvement included in this document is summarized in Figure 1. Total government investment in transportation infrastructure could be at a higher investment level included in this document. Figure 1 does not include the expenditures for infrastructure maintenance and operation.

(\$ MILLIONS)

PROGRAM	2024	2025	2026	2027	TOTAL*
Highway Assistance Program¹ (Figure 2)	2,301	1,988	1,883	1,736	7,908
Transit Assistance Program² (Figure 2)	693	588	1,329	925	3,535
Rail Service Improvement Program³ (Figure A-5)	12	1	1	0	14
Port Development Assistance Program⁴ (Figure A-7)	14	12	5	1	32
TOTAL*	3,020	2,589	3,218	2,662	11,489

*May not total correctly due to rounding

¹The Highway Assistance Program includes all federal aid for highways received through the Federal Highway Administration (FHWA) of the (USDOT). It includes all federal apportionment, allocation or special funding. It also includes all state trunk highway funds appropriated for construction, other state appropriated investments and any local funding utilized as match for federal projects. The Program Listing definition is included on page III of the STIP following with a list of projects sorted by MnDOT district.

²The Transit Assistance Program includes all federal aid for transit received through the Federal Transit Administration (FTA) of the USDOT. It also includes all state and local funds necessary to match the federal funds and operate the transit systems. All transit projects are included in the STIP and an estimated funding summary is included in Appendix A-3.

³The Minnesota Rail Service Improvement Program (MRSI) was established in 1976 to prevent the loss of rail service on lines potentially subject to railroad abandonment. Projects that fall within the MRSI are divided among 6 programs: freight rail economic development grant program, rail line rehabilitation, capital improvements for railroads and rail shippers, purchase assistance to rail authorities, loan guarantees and state rail banking. The MRSI Program does not include funding for rail-highway safety projects included in the highway assistance program. The number of rail service assistance projects is estimated and shown in Appendix A-5.

⁴ The Port Development Assistance Program was created in 1991. From 1996 to 2023 the Legislature has set aside a total of \$72.3 million to fund this program. The total port development assistance program anticipated expenditures is included in Appendix A-7

II. STATE TRANSPORTATION - IMPROVEMENT PROGRAM (STIP)

Certification

In accordance with 23 CFR 450.220(a), the Minnesota Department of Transportation (MnDOT), as the Governor's designee, certifies that the transportation planning process is being carried out in accordance with the following requirements:

1. 49 U.S.C. 5303 and 5304: Transportation
2. 23 U.S.C. 134 and 135: Highways
3. Title VI of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000d-1) and related statutes and regulations:
 - 49 U.S.C. 5332 of Title VI in Transportation: Prohibiting discrimination on the basis of race, color, creed, national origin, sex, or age in employment or business opportunity
 - 49 CFR Part 21: Nondiscrimination in federally assisted programs of the Department of Transportation
 - 42 U.S.C. 12101 et. seq. and 49 CFR Parts 27, 37, and 38: The provisions of the Americans with Disabilities Act of 1990
 - 42 U.S.C. 6101, The Older American Act: prohibition of discrimination on the basis of age in programs or activities receiving Federal financial assistance
 - 23 U.S.C. 324: Prohibition of discrimination based on sex
 - 29 U.S.C. 794: Section 504 of the Rehabilitation Act of 1973 and 49 CFR Part

- 27 prohibiting discrimination against individuals with disabilities
- Federal Executive Order 12898: Environmental Justice
- Federal Executive Order 13166: Limited English Proficiency (LEP)
- 49 CFR Part 26: Disadvantaged Business Enterprises (DBE) in US DOT funded projects
- 23 CFR Part 230: Equal employment opportunity program on Federal and Federal-aid highway construction contracts
4. 42 U.S.C. 7504, 7506 (c) and (d) and 40 CFR Part 93 Sections 174 and 176 (c) and (d) of the Clean Air Act.

The 20-Year Minnesota State Highway Investment Plan – Projects in the STIP are consistent with the *20-Year State Highway Investment Plan* (MnSHIP) and the Statewide Multimodal Transportation Plan (SMTP). MnSHIP addresses federal planning requirements, the transportation goals identified in state law, and reflects *MnDOT's SMTP* and the *Minnesota GO 50-Year Statewide Vision*. The process for developing and updating MnSHIP provides early and continuous opportunities for the involvement of the public and other potentially affected parties.

In accordance with Minnesota Statutes §174.03, Subdivision c, SMTP is updated every 5 years. The SMTP update was completed in December 2022. MnSHIP is currently being updated and is anticipated to complete by the end of 2023. MnDOT develops a 10-year Capital Highway Investment Plan (CHIP) to present MnDOT's planned capital state highway investments for the next ten years, which

includes state highway projects in the four years listed within this STIP. The CHIP is updated annually and reflects the investment direction established in MnSHIP.

MnSHIP is available for download at the following web address: <http://www.dot.state.mn.us/planning/mnship/index.html>

The SMTP is available at:

<https://www.dot.state.mn.us/minnesotago/SMTP.html>

Public Involvement

The last several Federal Transportation Acts have created less of a federal presence in many transportation decisions. The diminished federal role results in more state/local authority and responsibility for these decisions. The funding flexibility and expanded project eligibility under these acts has given decision makers more options to address transportation priorities. Public involvement in transportation issues and decision making is vital because of this expanded eligibility and diversity. Federal Law requires an opportunity for early and continuous involvement in the development of the STIP. Public involvement is also a mandatory component of the MPO planning process.

Minnesota's transportation investment process with the Area Transportation Partnerships (ATPs) provides for early and continuous involvement in the development of the STIP. The process incorporates the public involvement activities of the partners (MPOs, RDCs, counties, cities, townships, and others) into their roles on the ATP. MPOs in accordance with federal requirements have developed public participation processes and use them in conjunction with the development of their Transportation Improvement Programs (TIPs). The MPO TIPs,

as well as the MPO Public Involvement Plans (PIP) include detailed discussion of public involvement.

In addition to the public input derived through Minnesota's transportation investment process, public meetings, forums, conferences and focus groups have been held throughout the state by the ATP partners, MnDOT and modal partners such as transit, rail and bike/pedestrian.

Other methods used to encourage public involvement and outreach included the use of newspaper articles, informational mailings, press releases, websites, and social media. A notice of the availability of the draft 2024-2027 STIP was posted on MnDOT's website and placed in the *State Register* on June 5, 2023. This notice provided a 30-calendar day comment period to the public which ended July 5, 2023. During this period of time, comments may be submitted on-line at:

<https://www.dot.state.mn.us/planning/program/stip.html>

The Metropolitan Council and its Transportation Advisory Board (TAB) make a concerted effort to ensure all interested and concerned parties are offered opportunities to participate in the preparation of the TIP for the Twin Cities metropolitan area. Public comment is solicited at public meetings and in a 45-day public comment period where comments are also accepted by email, phone, or mail. At the TAB's regular public meeting on May 17, 2023, the TAB adopted the draft TIP for the purpose of public comment; the public comment period was from May 17, 2023 – July 3, 2023. Metropolitan Council made notifications by web announcement and web page notice, email, social media, newspaper advertisement, and online public meeting. They reached out to groups representing a diverse set of stakeholders ranging from partner agencies, transit providers, and community-based organizations. The

Council hosted an online public meeting with the Metropolitan Council Transportation Committee meeting on June 20, 2023, in which public comments were also received.

Minnesota Transportation Process for Investment Decisions

The STIP is developed in accordance with the *Guidance for the Development of the State Transportation Improvement Program* published by MnDOT and with the memo on *STIP Funding Guidance* distributed to the Districts/ATPs on December 13, 2022. Minnesota's STIP is developed through a regional geographic model for making investment decisions.

The STIP Development process is driven by federal, state, local, and regional planning goals and objectives. Statewide investment goals have been drawn from statewide planning studies and policies, the Minnesota Statewide Transportation Plan, and an analysis of previous programs. They are offered as an aid in determining area wide priorities. The process builds on the plans and priorities established by MnDOT Districts, MPOs, cities, counties, townships and RDCs.

The investment process uses eight regional partnerships whose boundaries are based on county boundaries that align with MnDOT's State Aid Districts. The partnerships, called Area Transportation Partnerships (ATPs), have as their members both traditional and non-traditional, metropolitan and non-metropolitan stakeholders and can include MPOs, RDCs, cities, counties, townships, transit providers, tribal governments, other interests, and MnDOT. The ATPs integrate the state and local priorities within their region and recommend a minimum four-year program for federally funded transportation investments. This four-year program, when combined with a list of state

highway funded projects is considered the draft Area Transportation Improvement Program (ATIP). Each draft ATIP includes a prioritized list of projects that aid in solving transportation problems and implementing the long-range objectives for the area.

Balanced investment decisions promote effective and efficient transportation. Safety is a key element of all investments. The principal investment emphasis is preservation and operational improvements in the existing transportation system.

The draft ATIP prepared by each ATP is submitted for inclusion in the draft State Transportation Improvement Program (STIP). Project cost estimates include an adjustment for inflation of approximately 4 percent. The ATPs are analyzed and compared to statewide goals and objectives set by MnSHIP, and unique transportation needs. They are also analyzed for completeness and fiscal constraint. From this, a draft STIP is developed. The draft STIP is widely circulated for review and comment before final adjustments are made. This STIP covers four state fiscal years and includes all state and local projects financed with federal (highway or transit) assistance. The STIP also includes other regionally significant projects.

The final STIP is reviewed and approved by the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) prior to any expenditure of federal funds. Upon approval, the document will be used by each ATP as a starting point in the process for developing their next ATIP.

Project Selection

The project selection process is the identification of the projects. MnDOT reserves the right to select projects for the

first year of the STIP from the projects in the last three years of the STIP. An initial draft selection of projects is made from the list of projects within the draft ATIPs. This includes the analysis of the preferred sources of funding for the projects, the MnSHIP investment direction and maintaining fiscal constraint. The draft STIP is made available for public review and comment and circulated back to the Districts and ATPs for document, review and comment. Changes are made in the draft STIP as a result of the review and comment period. The revised STIP is then forwarded to the Commissioner's staff for review and approval before being sent to FHWA and FTA for approval.

In 2017, the Minnesota Legislature directed the Minnesota Department of Transportation to develop and implement a new transparent and objective policy for the selection of state highway construction projects. The new project selection policy (MnDOT Policy OP016) applies to the selection of state highway construction projects in the STIP as well as the 10-Year Capital Highway Investment Plan. The new project selection policy was implemented with the 2020-2023 State Transportation Improvement Program (STIP) and 2020-2029 Capital Highway Investment Plan (CHIP).

MnDOT uses objective criteria to assign numeric scores in all selection processes subject to this policy. The list below indicates categories and programs within which projects have been selected for inclusion in the STIP. The category and score are listed in the STIP for projects subject to the policy. The numeric scores inform project selection decisions, but MnDOT may consider other factors in addition to the numeric score when making final selection decisions. When MnDOT does not select a high scoring project or selects a lower scoring project, MnDOT will provide a short explanation for the reasoning

behind the decision in addition to the project score. The list of projects selected and those considered but not selected, criteria, scores and reasoning behind decisions are posted online at: <http://www.mndot.gov/projectselection>

Project Selection Categories Include:

- Pavement
 - National Highway System
 - Non-National Highway System
 - Urban Roadways
- Bridge
 - National Highway system
 - Non-National Highway system
 - Culverts (NHS and non-NHS)
 - Railroad over State Highways
 - Pedestrian and Bicycle bridges and underpasses
- Non-Motorized
 - Replacement and rehabilitation of MnDOT owned sidewalks and trails
- Metro and Greater MN Mobility and Capacity Expansion projects
- Statewide standalone proactive and reactive safety projects
- Statewide standalone bicycle and pedestrian infrastructure projects
- Specialty and competitive programs
 - Corridors of Commerce
 - MN Highway Freight program
 - Highway Safety Improvement program (HSIP)
 - Intelligent Transportation Systems (ITS)
 - Local Partnership Program (LPP)
 - Railway-Highway Grade Crossing Program
 - Safety Rest Area
 - Standalone Noise Barrier
 - Transportation Economic Development (TED)
 - Weigh Station Capital Improvement Program

Financial Plan

As mentioned in the Preface of this document, this STIP is a formal response to federal requirements. The STIP financial plan addresses fiscal constraint requirements. The principal financial assumption is the funding of the federal program as authorized by IJA. All projects in the 2024-2027 STIP are deemed acceptable for implementation under these reasonable financial assumptions. The financial constraint requirements under IJA are deemed to be sufficiently flexible to permit the selection of projects from the second through fourth year of the STIP to replace projects selected for the first year of the STIP. MnDOT reserves the right to make this project selection for the ATPs from within the STIP. MnDOT has implemented four financial policies that have applied to the program for a number of years. These policies include Fund Balance, Cash Balance, Advance Construction, and Debt Management.

Federal Funding. IJA requires that the federal-aid highway and federal-aid transit projects in the STIP be based on financing reasonably expected to be available. The 2024-2027 STIP is based on anticipated federal, state and local funds. The federal-aid revenues are based on estimates of formula apportionment.

Federal-Aid Highway Formula Funding: Federal-aid highway formula funding is apportioned to the states by formulas established in law. Federal-aid highway apportionments have been highly variable. Minnesota developed this STIP based on a forecast estimate for obligation authority. Under IJA, the federal-aid highway obligation authority estimate for the development of this STIP is approximately \$866.27, \$871.48, \$858.31, and \$848.31 million for fiscal years 2024 through 2027, respectively.

Federal-Aid Highway Transfers of Funding: Flexing of Congestion Mitigation Air Quality and Surface Transportation Program funding is estimated at \$45 million in 2024, \$48 million in 2025, \$48 million in 2026, and \$10 million in 2027. These funds are transferred to Federal Transit Administration (FTA) for the acquisition of transit buses. In addition, funds are transferred for Research projects which Minnesota participates in, but MnDOT is not the lead Agency.

Federal-Aid Highway Allocation Funding: Funding available from allocations is included in the STIP. Federal-aid highway allocation funding is distributed to the states by administrative formula or by means of a competitive application. Allocated funds include many varied categories of federal aid, including, but not limited to Public Lands, Indian Reservation Roads, Federal Lands Access.

Projects with allocated funding are routinely added to the STIP, but due to the timing of project identification, projects may require amendments or modifications to be processed.

Congressionally Directed Spending/Community Project Funding: Some federal highway funds come to Minnesota through a process called Congressionally Directed Spending or Community Project Funding, both formally called “earmarking”, which is the legislative assignment of funds for specific projects. Most federal funding requires a “match” of state or local funds. Earmarked funding is subject to obligation limitation but is available until spent. Due to project delivery schedules and the rules pertaining to the spending of these funds, the actual level of funding committed each year may vary. To date, most of Earmarked funding has been spent and

projects have been closed out providing the uncommitted funds to be repurposed. IJA does not provide Earmark funding.

IJA Discretionary Grants: Many organizations around the state of Minnesota now have the opportunity to compete for various discretionary grant programs created under IJA. IJA grant programs cover a wide range of initiatives and projects which includes, but not limited to, Rebuilding American Infrastructure with Sustainability and Equity (RAISE), Bridge Infrastructure, Carbon Reduction, Charging and Fueling Infrastructure, Electric Vehicle Infrastructure, Resiliency, and Safety Streets for All.

Federal Transit Funding: Federal transit funding includes an urbanized area formula program, a non-urbanized area (rural, small urban and intercity bus) formula program, an elderly and persons with disabilities formula program and a capital formula program. Much of the transit program is based on grant applications. In the past, the actual flow of funding has varied. The passage of the Bipartisan Infrastructure Law (BIL) and its provisions to guarantee funding for transit programs allows predictability of federal transit funds; however, federal funds make up only a small percentage of total operating costs for the small urbanized and rural programs.

State Highway and Transit Funding. The State of Minnesota has a biennial budget. State agency programs and operating budgets are based on a balanced budget. The 2024-2027 STIP is based on one year of approved funding and three years of estimated funding. The State Highway funding level for the STIP is estimated to be approximately the same for all 4 years of the STIP.

State Highway Funding: Funding is expected to average about \$475 million per year from 2024 through 2027 based on

existing revenue sources. The Trunk Highway Fund's current and projected cash balances also permit advance constructing federal projects prior to actual federal dollars being available. Minnesota is confident it can match federal funds currently forecasted during the STIP 2024-2027 period. Shall additional Federal Funds become available during this time period, MnDOT has state Trunk Highway and Federal County Road and Bridge budget authority available to utilize these funds. Minnesota may use its federal funds for things such as Right of Way, Preliminary Engineering, and Construction Engineering in which Minnesota has historically used state funding.

State Transit Funding: The amount of service that Minnesota transit systems can provide is closely tied to the amount of funding provided by the state. The Minnesota Legislature decides on the funding levels for the state's Public Transit Participation Program in Greater Minnesota and the Met Council in the Twin Cities Metropolitan Area every two years. Transit assistance comes from two primary sources, the General Fund and the Motor Vehicle Sales Tax (MVST).

In Greater Minnesota public transit providers apply annually for operating, capital and planning activities. The transit appropriation from the State General Fund for Greater Minnesota is approximately \$58.2 million in FY 2024 and \$18.2 million each year thereafter. An additional source of funding for Greater Minnesota Transit is the sales tax on motor vehicle leases, added in the laws of 2008, chapter 152, and later amended. In FY 2017, the Legislature changed the formula for sales tax on leases: beginning in FY 2018, it was distributed 38% to the Greater Minnesota transit account, 38% County State Aid Highway fund, 13% to the Minnesota state transportation fund for local bridges, and 11% to the Highway User Tax Distribution fund. The MVLST amount for Greater

Minnesota Transit was approximately \$20 million in 2023 and is forecast to be approximately \$20 million in future years. The transit appropriation from the State General Fund for the Twin Cities Metropolitan Area is \$141.6 million in FY2024 and \$88.6 million in future years. A Constitutional Amendment passed in 2007 allocates a minimum of 40% of MVST revenues to transit purposes. Amended in the FY2023 legislative season, the 40% is split 5.7% for Greater Minnesota Transit and 34.3% for Metropolitan Area Transit.

Total transit funds in the Transit Assistance Fund (MVST and MVLST) were approximately \$60 million in 2023, increasing to \$85 million in 2027 for Greater Minnesota and \$359 million in 2023 increasing to \$388 million in 2027 for the Metro Area.

Local Highway and Transit Funding. Local funding is assumed to be available to match, or overmatch, the federal aid for highways and transit. The state and local funding is also expected to be sufficient to maintain and operate the highway and transit systems.

Local Highway Funding

The State has a dedicated fund for state-aid roads and bridges for counties and cities of 5,000 and over in population. The funding is available for maintenance and construction and is used in part to maintain the federal-aid highways and to match federal-aid. The local highway funding committed to match the federal highway aid is expected to average about \$244 million per year.

Local Transit Funding: The majority of the funding for the Minneapolis-St. Paul large-urbanized area transit system is provided through local and state revenues. Since transit is substantially a local program, estimates of urbanized transit

system funding are based on the MPO TIPs. Small urban and rural transit systems have a portion of their funding provided by assistance from the State General Fund. The local funds may be from a variety of sources.

Advance Construction. Federal law allows states to request and receive approval to construct Federal-aid projects prior to receiving apportionment or obligation authority for the Federal-aid funds using Advanced Construction (AC). This means that Minnesota may commit future federal funds to a project through the normal FHWA approval and authorization process. An AC project is treated the same as any other federal project and must be authorized prior to advertising for letting or expending any funds on the project. Projects using AC must be fully encumbered in the state MnDOT budget for the amount of state funds and the federal AC amount. AC is available to local governments as well as MnDOT.

The agency that uses the AC procedure must “front end” the project with their own funds. These may be state aid funds, local tax funds, State Road Construction funds or some other appropriate funding sources. Local projects utilizing AC funds require a special agreement approved by MnDOT’s Division of State Aid.

Federal regulations require that AC be shown in the year incurred and that the conversion of AC be shown in each year in which conversion takes place. Conversion is the process of converting AC to the obligation of actual federal funds. In the project listings in this STIP, AC funding is shown in a separate column and the dollar amounts are not included in the “Total” column. However, the AC conversion dollar amounts are included in the “FHWA” column and the “Total” column in the year in which a project is converted.

See Appendix C for MnDOT’s Detailed Federal Fiscal Constraint Plan.

Figure 2 is a summary of the proposed expenditures in the STIP by fiscal year and the proposed source of federal highway, transit, state trunk highway and other sources of local funding.

III. PROJECT LISTS

The following section contains the FY 2024-2027 STIP project listing sorted by District.

The first page of each District/ATP map shows the District/ATP location within the state and the counties included within each District/ATP. The name of the District Transportation Engineer, phone number, and address are shown as well as a general information telephone number.

The second page begins the listing of projects by District/ATP, sorted by Fiscal Year. Within each Fiscal Year, projects are sorted by transit projects first, followed by rail, local roadway, state projects, and setasides.

The following information is provided for each project in the STIP.

**FIGURE 4
PROJECT COLUMN HEADERS AND DEFINITIONS**

Project Column Heading	Definitions
SEQ#	The sequence number is a unique number assigned to each project in this project listing
CHIMES PROJECT NUMBER	CHIMES project identification number
DISTRICT	The district the project resides in
ROUTE SYSTEM	The route name and number where the project is located. See Figure 5.
STIP PROJECT NUMBER	Project identifier. Most trunk highway projects start with the control section numbers. Local projects start with either the county number or the city number.
YEAR	The year of the project
AGENCY	The jurisdiction responsible for implementing projects or for opening bids.
TECHNICAL PROJECT DESCRIPTION	The location and/or type of project. For **Smart Code** definitions see Figure 6.
MILE	The length of the project.
PROGRAM CODE	The program category. See Figure 7.
WORK TYPE	The intent of the project.
FUND TYPE	Preliminary funds assignment with exact determination of funding determined upon authorization. See Figure 8.
STIP TOTAL	The total estimated cost of the project relative to federal funding to be used in year of the letting. This includes advance construction (AC) conversion funding. It does not include the original advance construction funding.
FHWA	The total estimated federal aid highway funding to be used for the project. This includes advance construction conversion funding.
AC	The total estimated amount of future federal funds (AC) being committed to a project, front-ended by local/state funds.
FTA	The total estimated federal aid transit funding to be used for the project.
TH	The total estimated state trunk highway funding to be used for the project.
BOND	The total estimated state bonds to be used for the project.
OTHER	Estimate of funding other than FHWA, FTA or State TH to be used for the project. This includes local match, local funds, private contributions and special legislative appropriations.
PROJECT SELECTION CATEGORY	Categories or programs within which projects have been selected subject to the Project Selection requirement
PROJECT SELECTION SCORE	Numeric score assigned subject to Project Selection requirements.

**FIGURE 5
ROUTE SYSTEM CATEGORIES**

Route System	Definition
COUNTYWIDE	Through-out the County
HIGHWAY CR	County Road Highway
HIGHWAY CSAH	County State Aid Highway
HIGHWAY I	Interstate System
HIGHWAY MN	MN Highway System
HIGHWAY MSAS	Municipal State Aid Street
HIGHWAY US	United State Highway
HIGHWAY 999	Districtwide Highway
LOCAL STREETS	Local
REC RAIL	DNR Recreational Trail
RR	Railroad
STATEWIDE	MnDOT Statewide
PED/BIKE	Pedestrian or Bike Path
TRANSIT	Transit

**FIGURE 6
PROJECT DESCRIPTION SMART CODES**

Smart Code	Definition
AB	Alternate Bid
AC	Advance Construction
BFP	Bridge Formula Program
BIP	Bridge Improvement Program (Grants)
B2020	2020 Chapter 3 Bonds
B2021	Laws 2021 1 st Special Session Designated Bonds
CDS	Congressional Directed Spending
CHAP 3	Chapter 3 Bonds
COC3	Corridor of Commerce (Bonds)
COC4	Corridor of Commerce (Bonds)
CRP	Carbon Reduction Program
MNXXX	Congressional Direct Spending Project
ELLE	Early Let Late Encumber
EP	Early Procurement
ER	Emergency Relief
FLAP	Federal Lands Access Program
**FLEX-XX	Projects Ready to be Advanced to 20XX
IDIQ	Indefinite Delivery Indefinite Quantity
IJA	Infrastructure Investment and Jobs Act
INFRA	Infrastructure for Rebuilding America (Grants)
INNO	Innovative Delivery Project
ITS	Intelligent Transportation System Project
LGA	Local Government Advance
LONSY	Local On System Bridge Program
NEVI	National Electric Vehicle Infrastructure
PROTECT	Promoting Resilient Operations for Transformative, Efficient, and Cost-Saving Transportation
PRS	Projects of Regional Significant
RAISE	Rebuilding American Infrastructure with Sustainability & Equity Grant Program
SEC164	MnDOT Section 164
SPP	Statewide Performance Program
SPPF	Statewide Performance Programs for Freight
TED	Trunk Highway Economic Development Account

**FIGURE 7
PROGRAM CATEGORIES**

Program	Description
AM	Municipal Agreement
AU	Utility Agreement
BI	Bridge Improvement
BR	Bridge Replacement
BT	Bike Trail
CA	Consultant Agreement
DR	Drainage
EN	Enhancement
FB	Ferry Boat Program
LP	Local Partnership Program
MA	Miscellaneous Agreements
MC	Major Construction
NA	For Information Only – (No Program)
NO	Noise Walls
PE	Preliminary Engineering
PL	Planning
PM	Preventive Maintenance
RB	Rest Area/Beautification
RC	Reconstruction
RD	Recondition
RS	Resurfacing
RT	Recreational Trail (DNR only)
RW	Right of Way Acquisition
RX	Road Repair (Bridge and Road Construction) (BARC)
SA	Supplemental Agreement/Cost Overruns
SC	Safety Capacity
SH	Highway Safety Improvement Program (HSIP)
SR	Safety Railroads
TM	Traffic Management
TR	Transit (FHWA)
B3	FTA Capital Program - Section 5309
B9	FTA Urbanized Area Formula – Section 5307
BB	FTA Bus and Bus Facilities – Section 5339
GR	FTA - State of Good Repair – Section 5337
NB	FTA Elderly and Persons with Disabilities – Section 5310
OB	FTA Non-urbanized Areas - Section 5311 & Section 5311(f)

**FIGURE 8
FUND TYPE CATEGORIES**

Fund	Description
BF	Bond Funds
BFP	Bridge Formula Program
BROS	Off System Bridge
CMAQ	Congestion Mitigation and Air Quality
DEMO	EARMARK
FFM	Federal Funds Miscellaneous
FLAP	Federal Land Access Program
FTA	Federal Transit Administration
HSIP	Highway Safety Improvement Program
LF	Local Funds or Other
NA	For Information Only (No Funds)
NHFP	National Highway Freight Program
NHPP	National Highway Performance Program (Interstates, NHS, and Principal Arterials)
RRS	Highway Rail Grade Crossings & Rail Safety
SF	State Funds
STBGP	Surface Transportation Block Grant Program
STBGP-TAP	Surface Transportation Block Grant Program for Transportation Alternatives
TED	Trunk Highway Transportation Economic Development Program

2346	8816-3366	STATEWIDE	8816-3366	2026	MNDOT	**SEC164**.: 2026 MNDOT WILL PURCHASE THROUGH AN EXISTING CONTRACT WITH AASHTO. THIS IS PART OF A SUITE OF SOFTWARE PACKAGES AVAILABLE THROUGH THE AASHTOWARE. THE PROJECT WILL ENTAIL UPLOADING EXISTING DATA-SOURCES AND CONNECTING TO LIVE DATA-SOURCES TO PROVIDE AN ONLINE USER PLATFORM. WORK WILL ENTAIL CONFIGURING DATA AND TESTING APPLICATION WITH WORKERS FROM DEPARTMENT OF PUBLIC SAFETY AND DEPARTMENT OF TRANSPORTATION. ALL WORK WILL BE DONE IN THE ONLINE PLATFORM AND INTERNET CONNECTIONS TO EXISTING SERVERS AND DATA SOURCES. ONCE SOFTWARE IS UPLOADED AND CONFIGURED PROPERLY, THE CONTRACT WILL HAVE TRAINING IN-PLACE WHICH WILL WORK TO TRAIN AS MANY RELEVANT USERS AS NEEDED. ONCE THE SOFTWARE IS RUNNING, AASHTO WILL CONTINUE TO PROVIDE ONGOING MAINTENANCE, OPERATIONS, TROUBLESHOOTING, AND LIVE ON-DEMAND TRAINING AND ON-DEMAND CUSTOMER SUPPORT.		MISC. GREATER MINNESOTA MPO PROGRAMS

In accordance with the joint FHWA/FTA Metropolitan Planning Rules, 23 CFR Section 450.326, each of the Metropolitan Planning Organizations in Greater Minnesota has developed and approved a four-year fiscally constrained Transportation Improvement Program (TIP). Each TIP provides a list of projects for which federal (FHWA and FTA), state (MnDOT) and in some cases, local funds are anticipated to be used. The federally funded projects have been selected through the MPO and/or Area Transportation Partnership (ATP) process and are included in the appropriate Area Transportation Improvement Program (ATIP).

Also included in the MPO TIP is a financial plan which discusses the program's fiscal constraint, a description of the anticipated effect of the TIP toward achieving the MPO's performance targets, and the MPO's certification that the MPO planning process is being carried out in compliance with all applicable federal requirements.

After adoption by the MPO and approval from MnDOT as the Governor's designee, the MPO TIP is incorporated by reference, without modification, into the STIP. Additionally, the federal and state (MnDOT) funded projects within the MPO area are listed in the STIP.

Highway Safety Improvement Program (HSIP)

HIGHWAY SAFETY IMPROVEMENT PROGRAM (HSIP)

The Highway Safety Improvement Program (HSIP) is a core Federal-aid program. The goal of the program is to achieve a significant reduction in traffic fatalities and serious injuries on all public roads. HSIP requires a data-driven, strategic approach to improve highway safety. HSIP goals for each district and ATP are determined by fatal and serious injury crashes. HSIP funds are managed at the statewide level by the Office of Traffic Engineering (OTE) and by the Office of Transportation System Management (OTSM).

MnDOT projects were selected for the 2022-2025 STIP through a centralized process. Three separate solicitations were held for the Greater Minnesota local projects, Greater Minnesota District projects and Metro projects. Low cost, systematic projects were prioritized over reactive single location improvements. Examples of funded projects: intersection lighting, enhanced edge lines, rumble strips, chevrons on curves and cable median barrier. All state and local HSIP projects must be approved by the Office of Traffic Engineering (OTE) before they are included in the STIP.

Projects were selected using the following criteria:

- Developed in a Road Safety Plan
- Systemic risk factors for fatal and serious injury crashes
- Sustained crash history, e.g., critical crash rate
- Benefit-cost ratio calculation
-
- Motor vehicle traffic volume (ADT)
- Pedestrian and bicycle safety elements

For Greater Minnesota local projects, the selection committee was comprised of:

- MnDOT Office of Traffic Engineering (3)
- MnDOT Office of State Aid for Local Transportation (2)

For Greater Minnesota District projects, the selection committee was comprised of:

- MnDOT Office of Traffic Engineering (1)
- District Traffic Engineering (2)
- District Leadership (1)
- District Planning (1)

For Metro ATP projects, the selection committee was comprised of:

- MnDOT Office of Traffic Engineering (1)
- Metro District Traffic Engineering (2)
- County and/or City Engineering (2)
- Metropolitan Council Regional Planning (1)

Transit Programs

FTA

- ✓ Public Transit Urbanized Area Formula Program (Section 5307)
- ✓ Capital Program (Section 5309)
- ✓ Elderly and Persons with Disabilities Program (Section 5310)
- Public Transit Non - Urbanized Area Formula Program (Section 5311)
 - Inter-City Bus Program (Section 5311(f))
- ✓ State of Good Repair (Section 5337)
- ✓ Bus and Bus Facilities
 - (Section 5339/Section 5339(b)/Section5339(c))

FHWA

- ✓ Surface Transportation Block Grant Program (STBGP)
- ✓ Surface Transportation Block Grant Program-
Transportation Alternative Program (STBGP-TA)
- ✓ Congestion Mitigation & Air Quality (CMAQ)

TRANSIT PROGRAMS

Federal Transit Administration (FTA)

A portion of the federal gas tax is placed in the Mass Transit Account of the Federal Highway Trust Fund. These funds are reserved for transit purposes and are managed by the FTA. Transit funding authorized by IIJA is managed in several different ways. Some transit funding is distributed by formula or grant application, and some is allocated to the states and/or transit authorities by FTA.

In Minnesota, FTA transit allocations for rural and small urban transit capital and operating assistance are managed by MnDOT's Office of Transit. These formula programs include the Enhanced Mobility of Seniors and Individuals with Disabilities Program and the Rural Area Formula Program. The Urbanized Area Formula Program (capital and operating assistance for urbanized areas with populations over 50,000) is provided directly to the urbanized area transit agency by FTA. In addition, FTA directly allocates Bus and Bus Facilities Formula Program funds to the states and/or transit agencies in urbanized areas for major capital needs such as fleet replacement and construction of transit facilities.

Federal Highway Administration (FHWA)

An investment in transit capital is eligible for federal highway funding under IIJA through the Surface Transportation Block Grant Program (STBGP) or Congestion Mitigation and Air Quality (CMAQ).

Tribal Transportation Program (TTP)

TRIBAL TRANSPORTATION PROGRAM

The Tribal Transportation Program (TTP) is co-administered by the Federal Highway Administration's Office of Federal Lands Highway and the Department of the Interior's Bureau of Indian Affairs (BIA). The Indian tribal government, in cooperation with the BIA or FHWA, (and any state or local government, or metropolitan planning organization as may be appropriate), develops a Transportation Improvement Program (TIP) that includes all TTP eligible projects and activities on which the Tribe intends to expend its TTP funds. The TTP TIP is approved by FHWA.

After approval, the TTP TIP is forwarded by FHWA to MnDOT for incorporation into the State Transportation Improvement Program (STIP). Below is a list of projects in the current approved FY 2022 State of Minnesota Tribal Transportation Improvement Program (TIP).

State of

Minnesota

Tribal Transportation Program Transportation Improvement Program 2022

This report includes all construction projects on current approved Tribal TIPs in this State.

INDIAN ROADS RESERVATION PROGRAM CSTIPS Module of ITIMS

CSTIP Report

The CSTIP report shows the full contents of one or more CSTIPS.

For example, if the report is requested for a particular reservation with a managing entity that also manages two other reservations, then projects for all three reservations are reported. This means that subtotal amounts are always correct, no matter what the filter might be. However, see the next remark on how to read subtotals.

The CSTIP Subtotal is the full total for values on the CSTIP.

The state subtotal is the sum of the values in the state and on the current CSTIP. This report does not show overall state totals.

The location subtotal is the sum of values for projects on a particular reservation and in a particular state. When a reservation lies in two states, project data for each part including the subtotal is presented in separate places.

Any type of CSTIP may be the subject of the report.

Recreational Trails Program

RECREATIONAL TRAILS PROGRAM

The Recreational Trails Program provides funds to develop, maintain, and enhance recreational trails for both motorized and non-motorized recreational trail users. Funds are appropriated to the State by formula, 50 percent equally among all eligible states and 50 percent in proportion to the amount of non-highway recreational fuel use. The maximum federal share in Minnesota is 75 percent for these projects, and a 25 percent cash or pre-approved in-kind match is required. Only state agencies, cities, counties, townships, tribal governments or private trail organizations sponsored by a local unit of government are eligible to apply.

The Minnesota Department of Natural Resources (MNDNR) administers this program for Minnesota. The Minnesota Recreational Trail Users Advisory Board (MRTUA) assists the MNDNR in project selections. The committee is comprised of three representatives of the ten identified trail user groups (bike, mountain bike, hike, ski, horse, in-line skate, ATV, Off-Road Vehicles, snowmobiles, Off-Highway Motorcycling) in Minnesota.

The Recreational Trails Program projects are listed on the following pages.

Minnesota Rail Service Improvement Program

MINNESOTA RAIL SERVICE IMPROVEMENT PROGRAM

The Minnesota Rail Service Improvement Program (MRSI), established in 1976, helps prevent the loss of rail service on lines potentially subject to abandonment by railroads. Using state-developed eligibility rules, the state and rail users and/or railroads enter into contracts for rail line rehabilitation, capital improvements, purchase assistance to rail authorities, loan guarantees and state rail banking. This program provides funding for projects in the form of loans and grants. Loan repayments are returned to the Minnesota Rail Service Improvement Program account to fund future rehabilitation projects.

Projects fall within the program areas identified below. The MRSI Program has identified \$27 million in railroad track project needs. Projects will move ahead if funding is available and project agreements can be completed and contracts executed. These loan projects are typically funded with state general obligation bond funds or state general funds.

Figure A-5 at the end of this section identifies the potential number of projects and funding.

The following six programs are funded under the Minnesota Rail Service Improvement Program.

Freight Rail Economic Development Grant Program

Provides grants to railroads, shippers, local governments, and other qualified applicants for eligible public or privately owned freight rail projects that both improve rail service and demonstrate a clear tie to economic development.

Rail Purchase Assistance Program

Assists Regional Railroad Authorities in acquiring rail lines that can be operated on a self-sustaining basis to provide local

rail service. MnDOT may provide up to 50 percent of the value of the property. State funds are secured and require repayment if the line is sold or ceases to serve the purpose intended.

Rail Rehabilitation Program

Provides low and no-interest loans to rehabilitate and preserve rail lines that are financially viable and have the potential to increase rail use. A shipper's survey, cost/benefit analysis, and a rehabilitation need assessment are conducted to determine which lines are prospective rail projects. Repayment of loans is required.

Capital Improvement Loan Program

Provides rail users and railroads with loans for projects that improve rail service and/or strengthen the financial condition of the associated line. Eligible projects have typically included capital improvements such as building and expanding industrial spurs, upgrading bridges and building more efficient loading/un-loading facilities. Repayment of loans is on a quarterly basis.

State Rail Bank Program

Allows the state to acquire and preserve abandoned rail lines for future transportation use or for transmitting energy, fuel or other commodities.

Rail User and Rail Carrier Loan Guarantee Program

Assists rail users in obtaining loans for rail rehabilitation and capital improvements by guaranteeing up to 90 percent of the loan. The 1994 Legislature further amended the statute, recreating the program as the Rail User and Rail Carrier Loan Guarantee Program. Not only rail users but rail carriers are eligible for assistance under the program. In addition to rail line rehabilitation, rolling stock acquisition and installation are eligible.

Additional information on the Minnesota Rail Service Improvement Program may be obtained from:

Minnesota Railway Highway Crossing Program-Section 130

MINNESOTA RAILWAY-HIGHWAY CROSSINGS PROGRAM – SECTION 130

Title 23 of United States Code (USC) Section 130 provides federal funding to States annually for the elimination of hazards at railway-highway crossings. The Section 130 Program has been correlated with a significant decrease in fatalities at railway-highway grade crossings since the program inception in 1987. The overall reductions in fatalities come despite an increase in the vehicle miles traveled on roadways and an increase in the passenger and the freight traffic on the railways.

A new risk-based approach has been implemented for our project selection process. MnDOT is using the following risk factors when looking at passive crossing locations: (1) roadway AADT, (2) total trains per day, (3) exposures (roadway AADT multiplied by total trains per day), (4) maximum timetable speed, (5) skew, (6) distance to nearby intersection, (7) distance to nearest crossing, (8) clearing sight distance, and (9) approaching sight distance.

In addition to these factors, our office solicits the railroads for locations that currently have an active warning device at those crossings. Parts may be hard to locate or obsolete, and the active warning device may be reaching the end of its useful life. Approximately half of our Section 130 funds are focused on replacing these antiquated systems.

Our office also receives input from the cities, counties and townships each fiscal year with their highest priorities. Projects identified as having the highest number of risk factors are funded that year, with those funds being managed and administered centrally.

Port Development Assistance Program

PORT DEVELOPMENT ASSISTANCE PROGRAM

The Port Development Assistance Program was developed by the state in response to the needs of the commercial navigation system. There are currently no dedicated federal funds available. The program provides a funding source that helps to ensure the continued commercial effectiveness of lake and river navigation terminals and helps to offset increases in the general costs of commercial shipping.

A number of conditions exist that warrant the port development assistance program in Minnesota. Many of the public terminals and docks in the state are in need of rehabilitation at costs beyond the means of local agencies. Local port authorities need help keeping their infrastructure intact, especially for our agricultural and mining industries. Funding from the program is used for facility and infrastructure upgrades and rehabilitation, facility expansion, capacity expansion, and systems upgrades.

Project proposals are prioritized based on need, employment generated and overall economic benefit. MnDOT's Office of Freight and Commercial Vehicle Operations, working with the state's port authorities, has identified a list of potential harbor improvement projects for 2023 and beyond. Past projects include rehabilitating or improving rail and truck access, dock walls, building roofs, sprinklers and electrical systems, mobile handling equipment and adding warehouse capacity.

The Minnesota Legislature has made the following appropriations to the Port Development Assistance Program:

- 1996-2017 - \$27 million (Bonds)
- 1996-2017 - \$8 million (General Funds)
- 2018 - \$5.2 million (Bonds)
- 2020 - \$14 million (Bonds)
- 2023 – \$18.1 million (Bonds)

To date, total state appropriations for the Port Development Assistance Program amount to \$72.3 million. The Ports have identified an additional \$150 million of future port development needs.

According to Minnesota law, Port Development Assistance funds cannot be added to other state-sponsored port investments. Port Development funds can be used with federal and local dollars to complete projects that benefit a port.

Additional information about the Port Development Assistance Program may be obtained from:

Patrick Phenow

**MnDOT
State Road
Construction (SRC) Program**

MnDOT STATE ROAD CONSTRUCTION (SRC) PROGRAM

In developing the 2024-2027 STIP, only federal-aid highway formula funds were subject to the ATP prioritized process. State funded projects are included in the STIP for informational purposes and were shared and discussed with the ATPs. MnDOT anticipates a high degree of flexibility in the use of federal or state funding sources for individual projects.

The estimated average annual state funds available for trunk highway construction activities is \$424 million. Actual amounts are slightly higher with a modest level of over programming. However, a portion of those state funds are reserved for statewide initiatives shown in District ATP C.

State funds are available to each MnDOT District to cover the following items in priority order:

1. Match federal dollars received through the ATP process Earmarked funding, Allocated funding, or IIJA Grants.
2. Estimate necessary District set-asides to cover supplemental agreements and cost overruns.
3. Estimate of right-of-way needs to cover all trunk highway projects, with appropriate lead time for expenditures. A single account will still be monitored by the MnDOT Office of Land Management. The MnDOT Districts must identify the expenditures for the correct State Fiscal Year (SFY).
4. A prioritized list of all other state funded projects or set-a-sides. This list will include all Municipal Agreement Projects, Bridge and Road Construction Projects and Landscape Partnerships.

5. Estimates for District set-asides to cover internal salaries, external consultant services, project development and program support.

MnDOT's State Road Construction Program (SRC) is legislatively constrained by an annual budget level. The exact budget level can vary by biennium. The STIP program level may not coincide with the SRC budget level if MnDOT is more or less successful than anticipated during the ATP process. If the program level is significantly higher, legislative action would be required to raise the budget level. The STIP is fiscally constrained, but MnDOT's SRC budget includes a level of advance construction programming.

Project totals (all four years of the STIP) for the MnDOT State Road Construction Program (SRC) are provided in Figure A-8. Figure A-9 gives the SRC program totals by District/ATP and year. Totals for the SRC include dollars funded by federal advance construction funds, which may exceed actual federal dollars available in any given year. This is due to the fact that AC can be converted over more than one year.

Appendix B

Federal Performance Measures and Targets

FEDERAL PERFORMANCE MEASURES AND TARGETS

MAP-21, signed into law in 2012, established performance-based planning and identified the federal performance measures for safety, pavement, bridge, reliability, freight, CMAQ and transit asset management. The requirements continued through the FAST Act, signed into law in 2015 and the IIJA signed into law in 2021. States are required to develop short term targets for each federal measure and the projects selected for the STIP are also required to support achievement of these short-term targets.

MnDOT has a mature system of performance measurement and performance-based planning which was established long before the above referenced federal legislation. Minnesota GO started with the 50-year vision for transportation but extends to an entire family of plans that provide direction for different modes of transportation (highways, transit, rail, bikes, pedestrians, freight, aviation). The Statewide Multimodal Transportation Plan establishes guidance and priorities for state transportation decisions. System Investment Plans offer mode-specific strategies and guidance, establish performance measures and performance-based needs, conduct risk-based assessments and investment tradeoffs, and identify system priorities.

MnDOT establishes performance measure and targets through a public and stakeholder driven process, typically as part of long-range planning efforts. State measures identified in the family of plans have allowed MnDOT to track performance over time and inform decisions about how to invest and operate Minnesota's transportation system. A target for a state performance measure generally describes a desired outcome, a goal MnDOT continuously works to achieve. Federal measures required a short-term target setting that is accurately described

as an expected outcome, or what MnDOT thinks will happen. Transportation projects are programmed four-years out in the STIP and identified for the subsequent six-years in the CHIP. Federal short term performance targets are set in coordination with the MPOs and are generally based on the expected outcomes from programmed projects, which are selected based on investment direction in our long-range plans. The integration of federal performance measures with MnDOT's state performance measure system and performance-based planning process is ongoing. MnDOT has established and reported on all required federal performance targets.

Safety

The FHWA Safety Performance Measure Rule (PM1) established five safety performance measures to carry out the Highway Safety Improvement Program (HSIP). Safety performance targets are submitted annually as 5-year rolling averages to the FHWA as part of the HSIP Report. These performance measures are:

- Fatalities
- Fatality rate per 100 million VMT
- Serious injuries
- Serious injury rate per 100 million VMT
- Non-motorized fatalities and serious injuries

Targets for three measures (fatalities, fatality rate, and serious injuries) must align with targets submitted by Minnesota Department of Public Safety (DPS) to the National Highway Traffic Safety Administration (NHTSA).

The 2020-2024 Strategic Highway Safety Plan (SHSP) is Minnesota's plan to reduce fatalities and serious injuries all

public roads. The plan set a bold target of no more than 225 traffic deaths and no more than 980 serious injuries by 2025. Based on feedback from partners, no 2024 Target would be set higher than the prior year. All 2024 Targets are equal to the targets set for 2022 and 2023 rather than the progression set in the Strategic Highway Safety Plan.

**FIGURE B-1
MINNESOTA FEDERAL SAFETY PERFORMANCE
MEASURES AND TARGETS**

Performance Measure	2021 Actual and 5-year average	2022 Actual and 5-year average	2023 Target (5-year average)	2024 Target (5-year average)
Fatalities	488/397.0	444/414.2	352.4	352.4
Fatality rate (per 100 million VMT)	0.81/0.69	0.78/0.73	0.582	0.582
Serious Injuries	1,722/1,664.0	1,913/1,676.8	1,463.4	1,463.4
Serious injury rate (per 100 million VMT)	2.84/2.88	3.34/2.93	2.47	2.47
Non-motorist fatalities and serious injuries	284/280.8	335/282.4	258.4	258.4

NOTE: All targets are five-year rolling averages. 2021 results and 2023 targets are as published on FHWA’s state performance dashboard; 2022 results and 2024 targets are as submitted to FHWA via HSIP.

Pavement and Bridge Condition

The FHWA Pavement and Bridge Condition Performance Measure Rule (PM2) established performance measures to assess pavement condition and bridge condition for the National Highway Performance Program. Pavement and bridge condition performance is assessed and reported over a four-year performance period. The first performance period began on January 1, 2018 and ran through December 31, 2021. The current four-year performance period covers January 1, 2022, to December 31, 2025, with additional performance periods following every four years. These performance measures are:

- Percentage of Interstate Pavement in Good Condition
- Percentage of Interstate Pavement in Poor Condition
- Percentage of Non-Interstate NHS Pavement in Good Condition
- Percentage of Non-Interstate NHS Pavement in Poor Condition
- Percentage of NHS Bridges in Good Condition
- Percentage of NHS Bridges in Poor Condition

Two and four-year targets were established at the beginning of the current four-year performance period, with the option to update four-year targets at the two-year mark mid-cycle. Two-year targets for the current performance cycle represent expected pavement and bridge condition at the end of calendar year 2023, while the four-year targets represent expected condition at the end of calendar year 2025.

**FIGURE B-2
MnDOT FEDERAL PAVEMENT PERFORMANCE
MEASURES AND TARGETS**

Performance Measure	Baseline Condition/ Performance 2021	Condition/ Performance 2022	2-year Target (2023)	4-year Target (2025)
Percentage of Interstate Pavement in Good Condition	69.5%	70.6%	60%	60%
Percentage of Interstate Pavement in Poor Condition	0.6%	0.3%	2%	2%
Percentage of Non-Interstate NHS Pavement in Good Condition	61%	57%	55%	55%
Percentage of Non-Interstate NHS Pavement in Poor Condition	0.5%	0.5%	2%	2%

MnDOT continues to follow its investment direction for significant pavement condition investment. While the MnDOT pavement management system is not able to make predictions for the federal measure, the predicted values of MnDOT's state measures and their observed relationship to the federal measures indicate MnDOT will meet the two- and four-year federal targets for the 2022-2025 period. 2022 values support this indication.

The state legislature approved new funding in 2017 and MnDOT spent a large portion of it on long life pavement projects on the NHS to bring them out of poor condition. This increased investment both improved the current NHS conditions and extended their remaining service life. MnDOT has also increased preventive maintenance spending on the Interstate and NHS pavements to increase their life. MnDOT will continue to use preventive maintenance strategies such as crack sealing, chip seals, and microsurfacing to prolong pavement life. More extensive pavement fixes will also help bring NHS pavements into good condition.

**FIGURE B-3
MnDOT FEDERAL BRIDGE PERFORMANCE
MEASURES AND TARGETS**

Performance Measure	Baseline Condition/ Performance 2021	Condition/ Performance 2022	2-year Target (2023)	4-year Target (2025)
Percentage of NHS Bridges in Good Condition	31.8%	29.9%	30%	35%
Percentage of NHS Bridges in Poor Condition	5.8%	6%	5%	5%

MnDOT projects bridge condition based on its state measures, but the state and federal bridge measures track very closely. The predicted values of MnDOT's state measures for NHS bridges indicate MnDOT should meet the two- and four-year federal targets for the 2022-2025 period. New Bridge Formula

Program funds or potential grants are not reflected in any of the current forecasts.

MnDOT continues to follow its investment direction that calls for significant funding to go towards bridge condition investment. Recognizing the importance of using sound asset management principles to better address the priorities and needs of Minnesota bridges across the entire program, MnDOT is championing several asset management strategies for both the short and long term. These strategies include policy development, improving and validating bridge condition models, performance gap identification, network level lifecycle cost and risk management analysis, and optimization of preservation and rehabilitation for long term investment strategies.

MnDOT will also continue to invest in preventive maintenance strategies such as such as flushing, crack sealing, joint sealing, rail sealing and joint maintenance.

Reliability and Congestion Mitigation and Air Quality Improvement (CMAQ) Program

The third FHWA Performance Measure Rule (PM3) established measures to assess reliability of the highway system and the CMAQ Program. These performance measures are:

Highway Reliability

- Percent of person-miles on the Interstate system that are reliable
- Percent of person-miles on the non-Interstate NHS that are reliable

- Truck Travel Time Reliability Index (TTTR)

Congestion Mitigation and Air Quality Improvement (CMAQ) Program

- Annual hours of peak hour excessive delay per capita (PHED)
- Percent of non-single occupant vehicle travel (Non-SOV)
- Cumulative two-year and four-year reduction of on-road mobile source emissions for CMAQ funded projects (CMAQ Emission Reduction)

Highway Reliability

Two and four-year targets were established at the beginning of the four-year performance period, with the option to update four-year targets at the two-year mark mid-cycle. Two-year targets for the current performance cycle represent expected reliability at the end of calendar year 2023, while the four-year targets represent expected condition at the end of calendar year 2025. MnDOT estimates expected reliability by building off the baseline, but including adjustments based on judgement.

**FIGURE B-4
MnDOT FEDERAL RELIABILITY PERFORMANCE
MEASURES AND TARGETS**

Performance Measure	Baseline Condition/ Performance 2021	Condition/ Performance 2022	2-year Target (2023)	4-year Target (2025)
Percentage of Person Miles Traveled on the Interstate that are reliable	94.4%	93.8%	82%	82%
Percentage of Person Miles Traveled on the Non-Interstate NHS that are reliable	96.1%	94.7%	90%	90%
Truck travel Time Reliability Index (TTTR Index)	1.24	1.32	1.4	1.4

Reliability on the highway system increased dramatically due to the pandemic in 2020, while some bounce-back has occurred travel patterns are still uncertain and targets for the 2022-2025 reporting period were set conservatively. 2022 values indicate that MnDOT is on track to meet these 2023 targets.

Due to the new funding from the state legislature in 2017, MnDOT will be able to continue investing in Twin Cities Mobility through the full 20 years of the 2018-2037 State Highway Investment Plan. Twin Cities Mobility investment was originally scheduled to end in 2023 as the investment direction shifted to a primary focus of maintaining the existing system. MnDOT also continues operational strategies to

improve reliability including robust statewide snow and ice operations; incident clearance from metro area freeways; active traffic management strategies; and a network of E-ZPASS lanes. The Metropolitan Council’s Congestion Management Process (CMP) planning and implementation for the Minneapolis-St. Paul metropolitan area should also have a positive effect on these measures. The Congestion Management Process is a system of strategies facilitated by MPOs to improve the transportation system’s performance and reliability by reducing the adverse impacts of congestion. Though these measures are reported at the state level, results are driven by performance in the metro area. MnDOT has utilized the National Highway Freight Program federal funds to address truck freight mobility on locations selected on a competitive basis through the Minnesota Highway Freight Program. MnDOT has also identified key improvements needed at certain truck bottleneck sites within the STIP and the Capital Highway Investment Plan (CHIP). These investments align with the investment direction from the Minnesota Highway Investment Plan that has indicated that the state should target locations that are experiencing both the worst congestion as well as the most important freight needs.

CMAQ Program

CMAQ measures apply to urbanized areas that are in nonattainment or maintenance for ozone, carbon monoxide (CO), or particulate matter. The Minneapolis-St. Paul, MN-WI UZA came into attainment for CO in November 2019 and this measure is no longer required. Before the mid-performance period reporting in October 2020, MnDOT and the Met Council were required to set a PM₁₀ target due to a small portion of Ramsey County that is a maintenance area due to a stationary (non-transportation) source. The CMAQ performance measure reporting requirements applies until the 20-year maintenance period for PM₁₀ which ended in September 2022. The peak hour excessive delay measure

(PHED) and non-single occupancy vehicle measure are also reported. FHWA will reassess attainment status and release updated CMAQ applicability tables in October 2023. MnDOT and the Twin Cities urbanized area expect to be removed.

**FIGURE B-5
MnDOT/METROPOLITAN COUNCIL FEDERAL CMAQ
PERFORMANCE MEASURES AND TARGETS**

Performance Measure	Baseline Condition/ Performance 2021	Condition/ Performance 2022	2-year Target (2023)	4-year Target (2025)
Annual hours of peak hour excessive delay per capita	3.2	3.8	8.5	8.5
Percent of non-single occupant vehicle travel	26.7% (2020)	29.7% (2021)	28%	29%
Emissions reductions for PM ₁₀ through CMAQ projects (kg/day)	0.0	0.0	0.0	0.0

There was very little peak hour excessive delay (PHED) per capita in 2021 and 2022 due to the pandemic. MnDOT and the Metropolitan Council set two- and four-year targets for the PHED measure at the same level as the last performance period which was pre-pandemic. Non-single occupancy vehicle (SOV) travel has been incrementally improving in the Minneapolis-St. Paul area over the past several years which indicates that the region will continue to make progress on this measure.

For PM₁₀ emissions, CMAQ projects are expected to reduce emissions from this stationary (non-transportation) source by zero kg/day.

Transit Asset Management

The Federal Transit Administration (FTA) established four performance measures to evaluate state of good repair for transit assets. These performance measures are:

- Rolling Sock: Percentage of revenue vehicles exceeding useful life benchmark
- Equipment: Percentage of non-revenue service vehicles exceeding useful life benchmark
- Facilities: Percentage of facilities rated under 3.0 on the TERM scale
- Infrastructure: Percentage of track segments under performance restriction

Transit Asset Management (TAM) in MnDOT’s Office of Transit and Active Transportation (OTAT) provides consistent, accountable, and transparent program guidance for all Greater Minnesota transit providers. It aids in the decision-making process of balancing asset needs and demands for rolling stock, facilities, and equipment. For OTAT, rolling stock mainly includes revenue bus vehicles and no rail vehicles. Equipment mainly includes non- revenue service vehicles. Facilities range from General Purpose Maintenance – Overnight Storage Facilities to combined Administrative and Maintenance Facilities – including service and inspection.

The MnDOT sponsored group Transit Asset Management (TAM) plan includes all 27 of Minnesota’s Section 5311 rural transit systems. None of these transit systems currently have rail rolling stock or track segments. MnDOT and the transit systems developed the following performance targets for the TAM measures:

- All Rolling Stock: No more than 10% exceeding their Useful Life Benchmark (ULB)
 - Cutaway Buses (CU): 10-year ULB
 - Bus (BU): 14-year ULB
- Facilities: No more than 10% rated less than 3 on the FTA Transit Economics Requirements Model (TERM) Scale (1-5)
 - State of Good Repair being considered as 2.5 or greater
- Equipment (\$50,000 or more): No more than 10% exceeding ULB

MnSHIP Investment Priorities

The MnSHIP investment priorities provide the framework to support the federal performance targets. The MnSHIP identified an investment goal of 3.5% of funds toward safety to continue safety related infrastructure improvements. Infrastructure improvements alone, though, cannot achieve the goal of TZD or the federal safety targets. Driver behavior is also a critical factor.

The MnSHIP identified a combined investment goal of 67% of funds toward pavement, bridge, and other roadside infrastructure condition improvements. MnDOT uses the Office Replacement and Improvement System prioritization tool to identify its bridge investments. The total need amount in Bridge Condition is based on investing in all state highway bridges at optimal points in their life cycle over the next 20 years. BORIS also accounts for other factors in ranking priority for bridge projects, such as traffic volume, highway classification, and special vulnerabilities.

The MnSHIP also identified an investment goal of 0.1% of funds toward mobility improvements in Greater Minnesota and

4% of funds toward Twin Cities mobility improvements. The work identified included the build out of the majority of E-ZPass Express Lanes, and investment in operational and capital improvements at locations experiencing high travel time delay in the Twin Cities metro area and Greater Minnesota.

The MnSHIP called for an investment goal of 3% of funds toward the maintenance and improvement of bicycle and pedestrian networks. This includes the designation of eight state bikeways and a goal of substantial ADA-compliance by 2037. MnDOT is also working on installing accessible pedestrian signals at all signalized intersections and undertaking strategic stand-alone projects to fill gaps in the sidewalk network or as part of complete streets projects. MnDOT has completed its Statewide Bicycle System Plan, District Bicycle Plans and Pedestrian System Plan which provide direction on how to make improvements for pedestrians and bicyclists on Minnesota state highways. MnSHIP is currently being updated with a new investment direction. That investment direction will start with Fiscal Year 2028.

Appendix C
MnDOT's Detailed Federal
Fiscal Constraint Plan

DETAILED FEDERAL FISCAL CONSTRAINT PLAN

The Detailed Federal Fiscal Constraint Plan in Figure C-1 shows how MnDOT will be managing Advance Construction (AC) from 2024 through 2027. AC conversions (Paybacks) identified in the STIP are referred to as “Planned AC Conversion.” District/ATPs have identified and planned for these project conversions. Along with STIP identified “Planned AC”, the Office of Financial Management manages the program on a statewide basis using AC to provide for greater financial flexibility and to manage cash flow.

History shows that projects exceeding \$1 million are more likely to be paid out over more than one year. Recent project expenditure payouts are more in line with 50% in the first year, 40% in the second year, and 10% in the third year. For this reason, many projects can be adjusted to more closely reflect the actual timing of these expenditures. Use of these rates on additional AC projects allows MnDOT to maximize the use of Federal funding. The Office of Financial Management manages the conversions of these projects on a statewide basis and refers to these projects as “Managed AC Conversions.”

Both “Planned AC Conversions” and “Managed AC Conversions” are generally processed based on the same criteria. The “unbilled” amounts usually determine the amount of AC that will be converted. The “unbilled” amounts are costs MnDOT has already incurred and have not yet invoiced FHWA for reimbursement because the project currently does not have any or enough federal funds obligated. Although the amount of “unbilled” is a driving factor in processing

conversions, there are other important factors that can determine which AC to convert. These include, but are not limited to, the availability of apportionments and the amount of available obligation authority received to date.

Figure C-1 illustrates how AC is used to manage MnDOT’s program. Lines (1) through (3) come from the STIP. Line (1) is the total Federal formula funds in the STIP for each year. Line (2) represents the amount of regular funds in the STIP total. Line (2a) shows projects that were converted early. Line (3) is the amount of “Planned AC Conversions” in the STIP total. Line (3a) is the amount of Planned AC Conversions that were converted early. Line (4) shows the planned amount of Line (2) for new *managed AC* for the current year. Line (4a) is the new managed AC percentage of regular federal funds. Line (5) is 50% of the new *managed AC* from the current year. Line (6) is 40% of the new *managed AC* from the prior year. Line (7) is 10% of the new *managed AC* from 2 years back. Lines (5) through (7) total the amount of managed AC in that state fiscal year. Line (8) is the difference between lines (2) and (4) representing the forecasted sum of the projects that are expected to use 100% of their Federal funds in that year. Line (9) is the same as line (3). Line (10) comes from analysis of the Planned Conversions which are anticipated to convert at a different rate than the expected 50% - 40% - 10%. Line (10) is the sum of lines (5) through (7).

MnDOT plans to continue its use of AC as a financial management tool. MnDOT’s intention is to encourage the use of AC by the District/ATPs when projects can be packaged or completion of a project will occur over more than one construction season. At the same time, MnDOT will centrally manage AC to ensure sound financial management.

Differences due to rounding

Minnesota Projected Levels of AC

The Federal AC shown in Figure C-2 shows the projected level of AC MnDOT will be carrying at the end of each state fiscal year. The ending level of AC includes those projects that were authorized by the Federal Highway Administration (FHWA), have been let, awarded and encumbered by the State. The state fiscal year runs from July 1 to June 30. Trunk Highway Projects that are authorized by FHWA but have not gone through the final process of encumbrance are not counted in the year Ending Balance of AC. The AC Beginning Balance comes from the previous years ending balance. New AC – Planned can be found in the STIP.

New AC – Managed, Managed Conversions, as well as the Planned Conversions can be found in the Minnesota Detailed Financial Plan, Figure C-1.

The strategy of using Managed AC on projects that were not planned to be Advance Constructed through the normal process allows MnDOT to manage through a time when Federal Funding could be uncertain. This practice will allow MnDOT to be able to absorb a reduction in Federal funds in a year and not have to reduce the short-term program, but still make the necessary corrections in the following year(s). Once current year Federal funds become available MnDOT will reevaluate the need to AC projects that fall in this group.

Federal Lands Program

FEDERAL LANDS PROGRAM

The Federal requirement under Title 23 U.S.C. § 204 requires that a Federal Lands Transportation Improvement Program (TIP) be developed as part of the transportation planning process for Federal Lands projects.

The listing reflects all newly identified and programmed and/or modified FY 2023-2026 TIP Federal Lands Mid-Year Update projects as of August 18, 2023.
