Presentation overview

For years prior to the December 31st, 2019 sunset date, MnDOT had been preparing for the institution of the new Manual for Assessing Safety Hardware (MASH) crash standards. Still to this day, MnDOT continues working toward this goal. This presentation will highlight the building blocks of MnDOT's MASH compliance plan and the ongoing transitional period. Frequently asked questions that have come up as things have developed will also be addressed.

Presenter

Ethan Peterson

Ethan Peterson started with MnDOT in 2016 as the State Pavement Marking & Product Evaluation Engineer. Before then, he worked in the private sector for almost 5 years preparing Traffic Impact Studies, Traffic Demand Management Plans, pavement marking plans, traffic signal plans, road & utility design plans, and completing several other traffic related tasks. He's a member of the Institute of Transportation Engineers and ATSSA.
